

G400

Hot stamping machine for glass bottles

The G400 can decorate bottles of spirits.
Its robust design and many technological innovations ensure high performance and optimum decoration quality.
The application is carried out on bottles which have been screen printed beforehand.
In order to ensure high-quality decoration, the application is carried out using a silicone cylinder.
The bottles are handled automatically, assuring decoration of up to 3,000 bottles per hour.
The G400 is a 'must' for a production line, and meets the requirements of the glass industry.
A print head is available for bottles with complex shapes.
