

TRIAX-CW-CVR

Hot stamping machine for counter wheels

High-throughput machine for hot stamping of industrial counter wheels.
 Servo driven control technology.
 Distribution and orientation of parts with an automatic vibrating bowl feeder.
 Storage hopper for more autonomy
 Indexing of the stamping by camera (CVR).
 Maintains the integrity of the parts.
 High throughput with up to 4,000 pieces per hour.
 Touch screen, making it easier to enter settings and memorize them.
 Commissioning and training of production staff.
 Certified for CE European safety standards.
