

## ULTIMAX-A

High throughput machine for hot stamping of spirits caps

The Ultimax A decorates spirits bottle caps at a very high rate. The many patented technological innovations ensure uncommonly high performance and top quality decoration. The Ultimax is the most rapid machine on the market. It can stamp up to 8,000 caps per hour in contouring over 360 degrees.

The machine is able to receive automatic distribution of the caps.

A CVI ensures 100% quality control of the caps.

A magnetic system ensures rapid positioning of the silicone die.

Remote maintenance.

Commissioning service

Training production staff.

Certified for CE European safety standards.

Associated equipment:

- Distribution and orientation of parts with a centrifuge bowl feeder.
- Storage hopper for additional autonomy
